

DHARITRI PANCHAL

IT Project Manager | Technical Delivery Manager | Agile Project Manager
+91 9664993744 | dharitripanchal517@gmail.com | [Linkedin Dharitri Panchal](#) | Ahmedabad, India
Open to Relocation: Germany & EU | Chancenkarte Eligible | German: A1-A2 (In Progress)

PROFESSIONAL SUMMARY

Results-driven IT Project Manager and Delivery Manager with 7+ years of end-to-end project ownership across SaaS, marketplace, and e-commerce platforms. Proven track record coordinating cross-functional teams of 8–12 engineers, managing international stakeholder relationships, and driving Agile delivery from discovery through production release. Experienced in project governance, risk management, budget estimation, resource allocation, and executive reporting — working directly with C-level clients across the US and the Middle East. Technically fluent in modern web and cloud architectures, enabling effective translation between business objectives and engineering execution, and actively relocating to Germany under the Chancenkarte programme.

CORE COMPETENCIES

DELIVERY & PROJECT MANAGEMENT	LEADERSHIP & STAKEHOLDERS	TECHNICAL EXPERTISE
- Agile / Scrum Delivery - Sprint Planning & Velocity - Roadmap & Release Management - Risk & Scope Management - End-to-End Project Ownership - Resource & Capacity Planning - Change Request Management - Project Governance & Reporting - Budget Estimation & Tracking	- Technical & Team Leadership - Stakeholder & Executive Management - Client Communication & Engagement - Cross-Functional Team Coordination - Requirements Gathering & Analysis - Vendor & Partner Coordination - Multicultural Team Management - Mentoring & Team Development - Business Analysis	- PHP · Laravel · Node.js · TypeScript - MySQL · PostgreSQL · MongoDB - REST APIs · AWS · Alibaba Cloud - CI/CD · Git · GitLab Pipelines - Mobile Coordination (iOS/Android) - Web Application Architecture - Third-Party & Payment Integrations - AI-Augmented Delivery Tools

AI DELIVERY TOOLS

Cursor AI | GitHub Copilot | ChatGPT / OpenAI | Claude (Anthropic) | Lovable AI | Prompt Engineering

PROFESSIONAL EXPERIENCE

IT Project Manager / Technical Lead | **Excellent Webworld, India**, July 2021 – Present

Delivery Manager and Technical Project Lead responsible for end-to-end project governance, stakeholder management, Agile delivery, and cross-functional team leadership across international client engagements.

- Led full project lifecycle management — initiating, planning, executing, and closing web and mobile projects across SaaS, marketplace, and e-commerce portfolios, with consistent on-time, in-scope delivery.
- Managed and allocated cross-functional teams of 8–12 professionals — backend engineers, frontend developers, QA specialists, and iOS/Android mobile developers — balancing resource capacity across parallel workstreams.
- Owned project governance and executive reporting — prepared structured status updates, milestone reports, risk summaries, and delivery forecasts for C-level and senior stakeholder review.
- Served as primary client liaison for US- and Middle East-based clients — facilitating requirements gathering, translating business objectives into technical specifications, managing scope change requests, and maintaining stakeholder confidence throughout delivery.
- Facilitated full Agile/Scrum delivery ceremonies — sprint planning, backlog grooming, daily stand-ups, sprint reviews, and retrospectives — sustaining predictable delivery velocity across multi-month engagements.
- Owned release and deployment governance — coordinated CI/CD pipelines (GitLab), environment configurations, and production deployment schedules, eliminating release risk and unplanned downtime.
- Maintained project-level risk and issue registers — proactively identified delivery risks, led mitigation planning, managed cross-team dependencies, and escalated critical blockers with recommended resolution paths.
- Directed budget estimation and effort planning — produced detailed effort breakdowns and cost forecasts for project scoping, change requests, and client proposals.

- ▶ Introduced AI-augmented delivery workflows (Cursor AI, GitHub Copilot, Claude, OpenAI, Lovable) — accelerating prototyping, documentation, and feature delivery velocity across engineering sprints.
- ▶ Coordinated vendor and third-party partner integrations — payment gateways, government compliance systems (ZATCA), cloud infrastructure (AWS, Alibaba Cloud), and logistics/communication APIs — managing delivery dependencies across external providers.

Web Developer (Delivery Contributor) | **Emphatic Technology, India**, November 2018 – July 2021

Contributed to Agile delivery teams across client web application projects, with progressive growth from implementation into module ownership and client-facing responsibilities.

- ▶ Delivered web application modules and RESTful API components within Agile sprint cycles, contributing to system stability and release quality across concurrent client projects.
- ▶ Collaborated cross-functionally with QA and senior engineers on defect resolution, improving release readiness and code quality in preparation for production deployments.
- ▶ Progressively assumed ownership of application modules and participated in client communication and requirements discussions — building the stakeholder management and delivery foundation for a technical leadership track.

KEY PROJECTS & DELIVERY HIGHLIGHTS

Skriti — Marketplace Platform (USA) Stack: Node.js (AdonisJS), TypeScript, MySQL, AWS, Stripe, Firebase

Role: Technical Project Manager / Delivery Lead

- ▶ **Business Challenge:** Delivered a marketplace platform from zero infrastructure — connecting 3,000+ end users with 100+ brand partners across complex multi-party transaction flows, with sole accountability to a US-based C-level client.
- ▶ **Delivery Approach:** Owned full project lifecycle, including architecture decisions, sprint planning, resource coordination across backend, frontend, and mobile tracks, and third-party integration governance (Stripe, AWS, Firebase). Served as the single point of contact for all client communication and delivery escalations.
- ▶ **Outcome:** Launched on schedule with 3,000+ users and 100+ brands onboarded at go-live. Zero critical production incidents post-launch. Client extended engagement for two additional feature phases.

Mustadam — E-Commerce & Marketplace Platform (Middle East) Stack: Laravel (PHP), MySQL, iOS (SwiftUI), Android (Kotlin), Alibaba Cloud, GitLab CI/CD

Role: Delivery Manager / Technical Project Lead

- ▶ **Business Challenge:** Government-regulated multi-seller, multi-warehouse e-commerce initiative requiring ZATCA e-invoicing compliance, simultaneous web and mobile delivery, and 8 third-party service integrations under strict regulatory timelines.
- ▶ **Delivery Approach:** Led 4 parallel development streams across a 10+ person cross-functional team over 6 phased releases. Defined governance structure, managed Alibaba Cloud infrastructure, maintained stakeholder alignment through structured weekly delivery reviews, and owned all scope change and risk management processes.
- ▶ **Outcome:** Delivered a fully government-compliant, multi-channel platform on schedule across all phases. CI/CD pipeline governance eliminated the risk of manual deployment. All phased milestones met without scope or timeline deviation.

Flowers Cakes Online — E-Commerce Platform Stack: PHP (CodeIgniter), MySQL, PayPal, PayU Money, CC Avenue

Role: Project Coordinator / Technical Lead

- ▶ Led web and mobile e-commerce delivery — managing payment gateway integrations, coordinating release cycles, and facilitating client feature prioritisation workshops to maintain scope control.

Berbe — Real-Time Travel Information Platform Stack: Laravel, MySQL, AWS, Firebase, Google Analytics

Role: Technical Lead / Delivery Coordinator

- ▶ Directed delivery of web and mobile applications with real-time data requirements — coordinating backend, mobile, and analytics teams against a time-sensitive product roadmap with clear milestone accountability.

EDUCATION

Diploma in Computer Engineering | Gujarat Technological University, India 2020

AVAILABILITY & RELOCATION

Location: Ahmedabad, India **Nationality:** Indian **Visa / Work Auth:** Chancenkarte eligible — transition fully self-managed **Availability:** Remote, hybrid, or on-site (Germany & EU)
